Web applications have a reputation of being slow, clunky and hard-to-use. The Acrylis platform corrects these issues by utilizing Acrylis Tools – an optimization suite which allows Acrylis to perform like a desktop application. You'll notice the ease of use and speed when browsing your listings!

FLASHY WEB SITE

Lots of real estate agent's sites look the same. Ever notice how there's only about half a dozen looks, and they get repeated on every agent's site? Not with Acrylis. Each agent has their own personality, and a look to match.

Why not give every listing your star treatment? With Acrylis, when your prospective buyers go to print the listing's page, they'll get a printer optimized copy with improved pictures and fully expanded text.
